

Acetylated Vetiver oil

CAS-No.:	84082-84-8 68917-34-0 73246-97-6 62563-80-8 The scope of this Standard includes, but is not limited to the CAS number(s) indicated above; any other CAS number(s) used to identify this fragrance ingredient should be considered in scope as well.
Synonyms:	Vetiveria zizanioides, extract, acetylated Oils, vetiver, acetylated Acetic acid, esters with vetiver oil alcohols Vetiverol, acetate Vetivert acetate (commercial name) Vetivert acetate (Haiti) (commercial name) Vetyveryl acetate (commercial name)

History:	Publication date:	2020 (Amendment 49)	Previous	2009	
			Publications:	2015	

	For new creation*:	February 10, 2021
dates:	For existing creation*:	February 10, 2022
*These dates apply to the supply of fragrance mixtures (form		res (formulas) only, not to the
	, ,	

RECOMMENDATION:	RESTRICTION

MAXIMUM ACCEPTABLE CONCENTRATIONS IN THE FINISHED PRODUCT (%):				
Category 1	0.050 %	Category 7A	0.10 %	
Category 2	0.050 %	Category 7B	0.10 %	
Category 3	0.050 %	Category 8	0.033 %	
Category 4	0.90 %	Category 9	0.20 %	
Category 5A	0.10 %	Category 10A	0.20 %	
Category 5B	0.10 %	Category 10B	3.8 %	
Category 5C	0.10 %	Category 11A	0.033 %	

Acetv	/lated	Vetiver	oil

Category 5D	0.033 %	Category 11B	0.033 %
Category 6	0.098 %	Category 12	No Restriction

FLAVOR REQUIREMENTS:	Due to the possible ingestion of small amounts of
	fragrance ingredients from their use in products in
	Categories 1 and 6, materials must not only comply
	with IFRA Standards but must also be recognized
	as safe as a flavoring ingredient as defined by the
	IOFI Code of Practice (www.iofi.org). For more
	details see chapter 1 of the Guidance for the use of
	IFRA Standards.

INTRINSIC	PROPERTY	DRIVING	RISK	DERMAL SENSITIZATION AND SYSTEMIC
MANAGEME	NT:			TOXICITY

RIFM SUMMARIES:

Maximum acceptable concentrations are based on a comprehensive safety assessment, considering various endpoints. Depending on the outcome of the safety assessment, it might be one or more endpoint(s) that will drive the derivation of the concentration levels. If more than one endpoint is of relevance, the maximum acceptable concentrations for each product category are derived from comparing maximum permitted level per endpoint consideration (e.g. dermal sensitization and/or systemic toxicity). Such maximum acceptable concentrations correspond to the lowest level obtained per category.

Additional information is available in the RIFM safety assessment for Acetylated Vetiver oil, which can be downloaded from the RIFM Fragrance Material Safety Assessment Center: http://fragrancematerialsafetyresource.elsevier.com/.

EXPERT PANEL FOR FRAGRANCE SAFETY RATIONALE / CONCLUSION:

The Expert Panel for Fragrance Safety reviewed all the available data for Acetylated Vetiver oil and recommends the concentrations for the 12 different product categories, which are the maximum acceptable concentrations of Acetylated Vetiver oil in the various product categories.
