### p-tert-Butyl-α-methylhydrocinnamic aldehyde (p-BMHCA)

<table>
<thead>
<tr>
<th>CAS-No.: 80-54-6</th>
<th>Molecular formula: C_{14}H_{20}O</th>
</tr>
</thead>
</table>

The scope of this Standard includes, but is not limited to the CAS number(s) indicated above; any other CAS number(s) used to identify this fragrance ingredient should be considered in scope as well.

<table>
<thead>
<tr>
<th>Structure:</th>
</tr>
</thead>
</table>

#### Synonyms:
- Benzene propanal, 4-(1,1-dimethylethyl)-alpha-methyl-p-t-Bucinal
- 2-(4-tert-Butylbenzyl)propionaldehyde
- p-t-Butyl-alpha-methylhydrocinnamaldehyde
- Butylphenyl methylpropionaldehyde
- alpha-Methyl-ß-(p-t-butylphenyl)propionaldehyde
- Lilial (commercial name)
- Lysmeral (commercial name)

#### History:
- Publication date: 2020 (Amendment 49)

#### Implementation dates:
- For new submissions*: February 10, 2021
- For existing fragrance compounds*: February 10, 2022

*These dates apply to the supply of fragrance mixtures (formulas) only, not to the finished consumer products in the marketplace.

#### RECOMMENDATION:
- RESTRICTION / PROHIBITION

#### FRAGRANCE INGREDIENT PROHIBITION:
- p-tert-Butyl-α-methylhydrocinnamic aldehyde (p-BMHCA) should not be used for any finished product application included under IFRA Categories 1 and 6 (lipsticks and oral care products).

#### RESTRICTION LIMITS IN THE FINISHED PRODUCT (%):
## p-tert-Butyl-α-methylhydrocinnamic aldehyde (p-BMHCA)

### FLAVOR REQUIREMENTS:

Due to the possible ingestion of small amounts of fragrance ingredients from their use in products in Categories 1 and 6, materials must not only comply with IFRA Standards but must also be recognized as safe as a flavoring ingredient as defined by the IOFI Code of Practice (www.iofi.org). For more details see chapter 1 of the Guidance for the use of IFRA Standards.

| methylhydrocinnamic aldehyde (Lysmeral) | (or Verdantiol) |

**INTRINSIC PROPERTY DRIVING RISK**

**DERMAL SENSITIZATION AND SYSTEMIC TOXICITY**

**RIFM SUMMARIES:**

Recommended concentration levels are based on a comprehensive safety assessment, considering various endpoints. Depending on the outcome of the safety assessment, it might be one or more endpoint(s) that will drive the derivation of the concentration levels. If more than one endpoint is of relevance, the recommended concentration levels for each product category is derived from comparing maximum permitted level per endpoint consideration (dermal sensitization and/or systemic toxicity). Such recommended concentration levels correspond to the lowest level obtained per category.

Additional information is available in the RIFM safety assessment for p-tert-Butyl-α-methylhydrocinnamic aldehyde (p-BMHCA), which can be downloaded from the RIFM Safety Assessment Sheet Database: http://fragrancematerialsafetyresource.elsevier.com/.

**EXPERT PANEL FOR FRAGRANCE SAFETY RATIONALE / CONCLUSION:**

The Expert Panel for Fragrance Safety reviewed all the available data for p-tert-Butyl-α-methylhydrocinnamic aldehyde (p-BMHCA) and recommends the limits for the 12 different product categories, which provide the acceptable use levels of p-tert-Butyl-α-methylhydrocinnamic aldehyde (p-BMHCA) in the various product categories.

In addition, they recommend not to use p-tert-Butyl-α-methylhydrocinnamic aldehyde (p-BMHCA) in any finished product application included in Categories 1 and 6.
