Methoxy dicyclopentadiene carboxaldehyde

**CAS-No.:** 86803-90-9
The scope of this Standard includes, but is not limited to the CAS number(s) indicated above; any other CAS number(s) used to identify this fragrance ingredient should be considered in scope as well.

**Synonyms:**
- 4,7-Methano-1H-indene-2-carboxaldehyde, octahydro-5-methoxy
- 8-Methoxytricyclo[5.2.2.1]decane-4-carboxaldehyde
- Scentenal (commercial name)

**History:**
- **Publication date:** 2020 (Amendment 49)
- **Previous Publications:**
  - 1998
  - 2007
  - 2008

**Implementation dates:**
- **For new creation***: February 10, 2021
- **For existing creation***: February 10, 2022

***These dates apply to the supply of fragrance mixtures (formulas) only, not to the finished consumer products in the marketplace.

**Recommendation:**
- RESTRICTION

**Maximum Acceptable Concentrations in the Finished Product (%):**

## CONTRIBUTIONS FROM OTHER SOURCES:

NONE TO CONSIDER BEYOND TRACES (SEE ALSO THE SECTION ON CONTRIBUTIONS FROM OTHER SOURCES IN CHAPTER 1 OF THE GUIDANCE FOR THE USE OF IFRA STANDARDS)

## INTRINSIC PROPERTY DRIVING RISK

| DERMAL SENSITIZATION AND SYSTEMIC TOXICITY |

## RIFM SUMMARIES:

Maximum acceptable concentrations are based on a comprehensive safety assessment, considering various endpoints. Depending on the outcome of the safety assessment, it might be one or more endpoint(s) that will drive the derivation of the concentration levels. If more than one endpoint is of relevance, the maximum acceptable concentrations for each product category are derived from comparing maximum permitted level per endpoint consideration (e.g. dermal sensitization and/or systemic toxicity). Such maximum acceptable concentrations correspond to the lowest level obtained per category.

Additional information is available in the RIFM safety assessment for Methoxy dicyclopentadiene carboxaldehyde, which can be downloaded from the RIFM Fragrance Material Safety Assessment Center: http://fragrancematerialsafetyresource.elsevier.com/.

## EXPERT PANEL FOR FRAGRANCE SAFETY RATIONALE / CONCLUSION:

The Expert Panel for Fragrance Safety reviewed all the available data for Methoxy dicyclopentadiene carboxaldehyde and recommends the concentrations for the 12 different product categories, which are the maximum acceptable concentrations of Methoxy dicyclopentadiene carboxaldehyde in the various product categories.
