Phenylacetaldehyde

CAS-No.: 122-78-1
The scope of this Standard includes, but is not limited to the CAS number(s) indicated above; any other CAS number(s) used to identify this fragrance ingredient should be considered in scope as well.

Molecular formula: C₈H₈O

Structure:

Synonyms:
Benzeneacetaldehyde
Benzylicarboxaldehyde
Hyacinthin
1-Oxo-2-phenylethane
α-Tolualdehyde
α-Toluic aldehyde
Phenylacetic aldehyde
Phenyl acetic aldehyde (pure) (commercial name)

History:
Publication date: 2020 (Amendment 49)

Implementation dates:
For new submissions*: February 10, 2021
For existing fragrance compounds*: February 10, 2022
*These dates apply to the supply of fragrance mixtures (formulas) only, not to the finished consumer products in the marketplace.

RECOMMENDATION: RESTRICTION

**FLAVOR REQUIREMENTS:**
Due to the possible ingestion of small amounts of fragrance ingredients from their use in products in Categories 1 and 6, materials must not only comply with IFRA Standards but must also be recognized as safe as a flavoring ingredient as defined by the IOFI Code of Practice (www.iofi.org). For more details see chapter 1 of the Guidance for the use of IFRA Standards.

**CONTRIBUTIONS FROM OTHER SOURCES:**
NONE TO CONSIDER (SEE ALSO THE SECTION ON CONTRIBUTIONS FROM OTHER SOURCES IN CHAPTER 1 OF THE GUIDANCE FOR THE USE OF IFRA STANDARDS)

**INTRINSIC PROPERTY DRIVING RISK MANAGEMENT:**
DERMAL SENSITIZATION AND SYSTEMIC TOXICITY

**RIFM SUMMARIES:**
Recommended concentration levels are based on a comprehensive safety assessment, considering various endpoints. Depending on the outcome of the safety assessment, it might be one or more endpoint(s) that will drive the derivation of the concentration levels. If more than one endpoint is of relevance, the recommended concentration levels for each product category is derived from comparing maximum permitted level per endpoint consideration (dermal sensitization and/or systemic toxicity). Such recommended concentration levels correspond to
Phenylacetaldehyde

the lowest level obtained per category.

Additional information is available in the RIFM safety assessment for Phenylacetaldehyde, which can be downloaded from the RIFM Safety Assessment Sheet Database: http://fragrancematerialsafetyresource.elsevier.com/.

EXPERT PANEL FOR FRAGRANCE SAFETY RATIONALE / CONCLUSION:

The Expert Panel for Fragrance Safety reviewed all the available data for Phenylacetaldehyde and recommends the limits for the 12 different product categories, which are the acceptable use levels of Phenylacetaldehyde in the various product categories.
