

Limonene

CAS-No.:	<p>138-86-3 7705-14-8 5989-27-5 5989-54-8</p> <p>The scope of this Standard includes, but is not limited to the CAS number(s) indicated above; any other CAS number(s) used to identify this fragrance ingredient should be considered in scope as well.</p>
Synonyms:	<p>p-Mentha-1,8-diene 1-methyl-4-prop-1-en-2-ylcyclohexene 1-Methyl-4-(1-methylethenyl)cyclohexene 1-Methyl-4-isopropenyl-1-cyclohexene 4-Isopropenyl-1-methylcyclohexene Cyclohexene, 1-methyl-4-(1-methylethenyl)- Dipentene</p>

History:	<table border="1"> <tr> <td>Publication date:</td> <td>1995 (Amendment 29)</td> <td>Previous Publications:</td> <td>Not applicable.</td> </tr> </table>	Publication date:	1995 (Amendment 29)	Previous Publications:	Not applicable.
Publication date:	1995 (Amendment 29)	Previous Publications:	Not applicable.		

Implementation dates:	<table border="1"> <tr> <td>For new creation*:</td> <td>Not applicable.</td> </tr> <tr> <td>For existing creation*:</td> <td>Not applicable.</td> </tr> </table> <p>*These dates apply to the supply of fragrance mixtures (formulas) only, not to the finished consumer products in the marketplace.</p>	For new creation*:	Not applicable.	For existing creation*:	Not applicable.
For new creation*:	Not applicable.				
For existing creation*:	Not applicable.				

RECOMMENDATION:	SPECIFICATION
------------------------	----------------------

FRAGRANCE INGREDIENT SPECIFICATION:	<p>Oxidation products of Limonene, especially hydroperoxides, have been demonstrated to be potent sensitizers.</p> <p>d-, l- and dl-Limonene and natural products containing substantial amounts of it, should only be used when the level of (hydro)peroxides is kept to the lowest practical level, for instance by adding antioxidants at the time of production. The addition of 0.1% BHT or α-Tocopherol for example has shown great efficiency. Such products should have a peroxide value of less than 20 millimoles per liter, determined according to the IFRA analytical method for the determination of the peroxide value, which can be downloaded from the IFRA website (www.ifrafragrance.org).</p>
--	--

FLAVOR REQUIREMENTS:	<p>Due to the possible ingestion of small amounts of fragrance ingredients from their use in products in Categories 1 and 6, materials must not only comply with IFRA Standards but</p>
-----------------------------	---

Limonene

	<p>must also be recognized as safe as a flavoring ingredient as defined by the IOFI Code of Practice (www.iofi.org). For more details see chapter 1 of the Guidance for the use of IFRA Standards.</p>

INTRINSIC PROPERTY MANAGEMENT:	DRIVING RISK	DERMAL SENSITIZATION
---------------------------------------	---------------------	-----------------------------

EXPERT PANEL FOR FRAGRANCE SAFETY RATIONALE / CONCLUSION:

The Expert Panel for Fragrance Safety reviewed all the available data for Limonene. Based on their expert judgement, they recommend to use the fragrance ingredient according to its specification mentioned above.
